1 Work

Summer 2023 - AI Sweden

For the summer 2023 I interned at AI Sweden, producing a proof of concept of using LLMs as an assistant for doctors and patients. It was a collaboration between AI Sweden and Sahlgrenska University Hospital, where we implemented Retrieval-Augmented-Generation using python, the OpenAI API, ChromaDB and SvelteKit.

Summer 2022 - Volvo

During the summer of 2022 I worked at Volvo Group IT with data analysis using Microsoft Azure. We examined a dataset of what documents volvo-mechanics would most often look up, and using python, pandas and databricks we produced an analysis of trends in the data.

Summer 2021 - Volvo

During the summer of 2021 I worked at Volvo Group IT, where me and another student from Chalmers worked with the monitoring system Grafana. It was used to monitor different statistics that were relevant to Volvo, such as server memory usage and the number of active support tickets.

2 Education

M.Sc Computer Science Autumn 2022 → Spring 2024

* Chalmers University of Technology

During my master my primary focus has been algorithms and AI. For algorithms I have taken courses covering theory like PTAS and load-balancing to more applied topics like MapReduce and Bloom Filters to name a few and for AI some topics include reinforcement learning, CNNs and language models.

B.Sc Software Engineering Autumn 2019 → Spring 2022

* Chalmers University of Technology

For my bachelors degree I had the chance to learn about things like testing, working with agile development, and the principles of what to do and not do when making software at scale, which has been very useful. I also had the chance to try studying more traditional computer science topics like functional programming and cryptography, which would lead me to my choice of master.

3 Skills

3.1 Programming Languages / Technologies

General Purpose Languages

Python , Java, C

Functional Languages

Haskell, Agda, Grammatical Framework

Web Development

React, SvelteKit

Other

Git, Linux, LaTeX

3.2 Human Languages

I am fluent in swedish and english.
